

Are you ready?

Achieve Big Goals. Faster.

Unleash the power of your team working together to meet your long-term company goals.

Align is more than just software. The habits you develop using Align create a company culture focused on transparency, accountability, open communication, strategy and execution.

Companies who successfully adopt the software are able to...

Articulate the Challenge (blog)

- Define the painpoint for the business at it's core
- Quantify the impact of that challenge (Revenue or Time)
- Secure leadership buy-in

Prioritize Learning at the Management Team Level

- Entire team read and discuss a business management book - Scaling Up, Good to Great, Measure What Matters, Great Game of Business - these are some great ones!
- Join a peer group like Vistage or EO or YPO
- Attend a leadership conference or take a master business course

Identify the Business Goals

- Read the Circle of Productivity article and create KPIs with management buy-in
- Hold a strategic planning session and create priorities for the upcoming quarter - start with the Alignment Quiz.
- Engage a business coach to guide you along the way

Elevate the Internal Champion

- Identify the person who has influence in the company
- Elevate that person
- Ensure they understand the business challenges and the vision for how to address those painpoints

**Achieving your goals requires discipline, hard work, and dedication.
Follow the recommendations above, then collaborate with the Align
team to execute with professional precision.**
